

QUEEN LIGHT

MACHINERY FOR INDUSTRIAL FABRICS

Woven Belt cutting machine Model **LHP-HCM200E**

IT ' S MIRACLE !

The cut-edge of
Woven Tube Belt
Quits of Self-sticking
After Heat Cut.

The machine rich in ideas
for the new millennium

Cut the woven belt with heated blade for fray prevention.

The tube-end is not sticking after heat-cut.

Optional device for further machine operation is provided.

Futures:

This machine overturns the established theory that the tube materials can not heat-cut without stick..

Thin to thick materials can be cut easily only for timer set adjustment.

Of course who no one not use .

Wide open head for easy maintain work

Belt edge after cut does not stick at all.

We offers as Optional devices

1. Marking device (printing)
2. Automatic stacking after cut with belt unwinding device
